^{*} Cautionary statement regarding forward-looking information
The Company bases the above forecasts on judgments that rely on currently available information and contain numerous
uncertainties. Changing conditions and other factors may cause actual results to differ from the above forecasts. For the suppositions
that form the assumptions for earnings forecasts and cautions concerning the use thereof, please refer to "1. Overview of Results of
Operations, etc. (4) Future Outlook."

1. Overview of Results of Operations, etc.

(1) Analysis of Results of Operations

Matters concerning the future in the text are based on the judgments of the Company as of the end of the fiscal year under review.

(i) General overview

During the fiscal year under review, we saw a tense economic situation where economic activities have been restrained owing to the global spread of COVID-19. Also in the manufacturing sector, capital investment was also restrained. While the future remained uncertain due to the prolonged pandemic of COVID-19, the economy in China, our largest market, began to recover ahead of other countries, and there were also signs of economic recovery in other regions in the latter half of the year.

In this business environment, formulating a long-term business plan "Next Stage 2026 – Toward Further Growth – ," Sodick Group has been making efforts to, based on its founding spirit of "create, implement, and overcome difficulties," to enhance its skills to contribute to a prosperous future and realize a sustainable society through monozukuri (manufacturing).

In terms of prevention of the spread of COVID-19 infection, Sodick has maintained a system of continuing business while reducing the risk of infection by encouraging working at home and staggered working hours, not to mention being thorough in safety and health. In addition, in order to contribute to society, we developed "Face Tech," a face shield frame, and supplied it to medical facilities, schools, and sports organizations.

On the R&D front, we have developed new products that meet market needs, such as the wire-cut EDM "AL i Groove Edition" series, with the world's first "Wire rotation mechanism," enhancing advantages in machining performance, resource conservation, stability, and automation, the V-LINE® inert gas dissolution injection molding system "INFILT-V" that facilitates the molding of biodegradable plastics, the large double shaft mixer "TM -350 W" that is suitable for mixing high-quality instant noodles and chilled noodles, and the ultra-high-speed small-hole drilling EDM "K4HL" that enables high-speed, high-precision, high-quality, long-time continuous machining of different hole diameters. This "K4HL" received the Monozukuri Prize at the Nikkan Kogyo Shimbun's 2020 (63rd) Best 10 New Product Awards.

As part of sales and service activities, we are conducting activities using IT in such a way as holding Web exhibitions or servicing through remote tools, as exhibitions cancelled one after another due to the impact of the COVID-19 pandemic.

Under these circumstances, the consolidated net sales for the fiscal year under review totaled \$58,030 million (down 14.1% year on year), with operating income at \$1,852 million (down 45.9% year on year), ordinary income at \$2,046 million (down 42.5% year on year) and profit attributable to owners of the parent at \$1,346 million (down 32.7% year on year).

(ii) Segment overview

Machine Tool	Net sales	¥38,024 million	Y/y change (rate)	Down 17.0%
Segment	Operating Income	¥2,896 million	Y/y change (amount)	Down 1,724 million yen

Owing to the spread of COVID-19 infection, the economy slowed down all over the world. A wide range of industries, including the automotive industry, the electronic component industry, and the aerospace industry, tended to postpone product shipment and capital investment owing mainly to the suspension of business activities. Demand in the 5G-related and semiconductor-related segments in China continued to recover after March and there were signs of recovery in other regions in the latter half of the fiscal year. However, net sales fell year on year.

Segment income also decreased year on year, chiefly on account of a lower plant-utilization rate associated with a decrease in sales volume.

Industrial Machinery	Net sales	¥10,931 million	Y/y change (rate)	Up 11.8%
Segment	Operating income	¥596 million	Y/y change (amount)	Up ¥431 million

Although economic activities have continued to be restrained owing to the impact of the global spread of COVID-19 infection, net sales rose year on year as there was a demand for next generation auto-related industries products, such as CASE, in addition to 5G smartphone related orders received from new customers in Greater China as a result of sales efforts.

Food Processing	Net sales	¥3,585 million	Y/y change (rate)	Down 42.9%
Machinery Segment	Operating income	¥65 million	Y/y change (amount)	Down ¥559 million

This segment is engaged in the development, production, and sale of a wide range of noodle-making machines, noodle-making plants, sterile-packed cooked-rice production systems, etc. as well as the provision of related maintenance services. There was a rising demand related to nest-dweller consumption incidental to refraining from going outside, in addition to that for sanitary equipment and equipment to respond to manpower reduction. However, due to the spread of COVID-19, sales activities were forced to be stagnant and there were some cases where the originally expected order date was postponed. Furthermore, owing to the absence of major noodle-making projects in the same period in the same period a year ago, sales plunged from a year earlier.

Others	Net sales	¥5,488 million	Y/y change (rate)	Down 4.3%
Others	Operating income	¥319 million	Y/y change (amount)	Up ¥8 million

Other segments consist of precision mold and precision molding operations involving the made-to-order production of precision connectors and other products, and elemental technology operations involving the sale, etc. of linear motors and ceramics components. Demand for ceramics is also increasing, reflecting the increased demand for information and communications equipment due to telework and other factors caused by the spread of COVID-19 infection. In the die and mold manufacturing business, there were signs of a recovery in demand in the automotive industry.

(2) Analysis of Financial Position

(i) Assets, Liabilities, and Net Assets

Total assets stood at ¥116,117 million as of the end of the year under review, an increase of ¥1,469 million from the end of the previous fiscal year, primarily due to a ¥5,047 million increase in cash and deposits, a ¥2,487 million decrease in accumulated depreciation and a ¥1,064 million decrease in merchandise and finished goods.

Meanwhile, liabilities at the end of the fiscal year under review totaled \(\frac{4}{5}\)8,140 million, an increase of \(\frac{4}{2}\),238 million from the end of the previous year, mainly reflecting a \(\frac{4}{4}\),878 million increase in long-term borrowings payable and a \(\frac{4}{2}\),201 million decrease in current portion of long-term borrowings payable.

Net assets totaled ¥57,976 million at the end of the fiscal year under review, a decrease of ¥768 million from the end of the preceding year, largely due to a ¥539 million decrease in foreign currency translation adjustment.

As a result, the equity ratio stood at 49.9% at the end of the fiscal year.

(ii) Cash Flows

Cash and cash equivalents (hereinafter, "cash") were ¥38,255 million at the end of the fiscal year under review, up ¥5,364 million from the end of the prior fiscal year, due to the following changes in cash flows:

Cash flows and reason for changes in cash flows during the year under review are described as follows:

(Cash flows from operating activities)

Cash acquired from operating activities of ¥5,270 million (as compared with ¥8,336 million acquired in the preceding fiscal year) was chiefly due to ¥2,078 million in profit before income taxes and ¥3,399 million in depreciation.

(Cash flows from investing activities)

Cash used by investing activities of ¥1,410 million (as compared with ¥5,609 million used in the preceding year) was primarily due to ¥1,538 million for the purchase of property, plant and equipment.

(Cash flows from financing activities)

Cash used by financing activities of \(\xi\)1,665 million (as compared with \(\xi\)2,228 million used in the previous year) was primarily due to proceeds from long-term borrowings payable of \(\xi\)12,500 million, partially offset by the repayment of long-term borrowings payable of \(\xi\)9,810 million and the payment of cash dividends paid of \(\xi\)1,176 million.

Cash flow indicators of Sodick Group trended as follows.

	FY ended Dec. 31, 2017	FY ended Dec. 31, 2018	Fiscal year ended December 31, 2019	Fiscal year ended December 31, 2020
Equity ratio (%)	45.2	48.7	51.2	49.9
Equity ratio based on market capitalization (%)	56.5	27.2	40.0	35.7
Ratio of cash flow to interest-bearing liabilities (years)	9.2	4.3	4.6	7.9
Interest coverage ratio (times)	17.4	29.3	28.5	18.1

Notes:

Equity ratio = Shareholders' equity / total assets

Equity ratio (%) based on market capitalization = Market capitalization / total assets

Ratio of cash flow to interest-bearing liabilities (years) = Interest-bearing liabilities / operating cash flow Interest coverage ratio = Operating cash flow / interest expenditure

- * The basis of calculation for all values is consolidated financial data.
- * Market capitalization is calculated by multiplying the closing price of Sodick shares at the end of the fiscal year by the number of shares outstanding (less treasury shares) at the end of the fiscal year.
- * Interest-bearing liabilities comprise all liabilities on the consolidated balance sheet on which interest is payable and non-interest bearing convertible bond-type bonds with share acquisition rights
- * Operating cash flow and interest expenditure refer to "Cash Flows from Operating Activities" and "Interest expenses paid" according to the consolidated statement of cash flows.

(3) Basic dividend policy and dividends for the current and following fiscal years

Given that Sodick holds custody over shareholders' valuable capital for the corporate activities of the Company, we are committed to ensuring sufficient internal reserves necessary for future business development and for strengthening management resources. Consistent with these principles, our basic policy for dividend payments has been to preserve stability and continuity. Specifically, we aim to maintain a dividend-on-equity ratio (DOE) of 2% or more, comprehensively taking into account the subject year's business results and cash flows.

We will be using internal reserves in effective ways from a long-term perspective for R&D and capital investment to continuously enhance the Company's operating results. For the period under review, in keeping with the dividend basic policy and consistent with our judgment of business performance, we propose an annual dividend of \(\frac{4}{25}\) per share, comprised of a fiscal year-end regular dividend of \(\frac{4}{13}\) and a second quarter-end dividend of \(\frac{4}{12}\).

For the next fiscal year, we expect to propose an annual dividend of \(\frac{4}{2}\)6 per share, comprised of a fiscal year-end regular dividend of \(\frac{4}{13}\)13 and a second quarter-end dividend of \(\frac{4}{13}\)13.

(4) Future Outlook

We expect that the demand for capital investment will continue to grow amid ongoing development of manufacturing at an international level in the medium and long run. Of all industries, the automotive industry, in which the Company's major customers operate, sees demand for automotive lightening and automotive electronics and electronic systems as well as fewer gasoline-powered vehicles further increase in response to CASE (Connected, Autonomous, Shared/Service, Electric) and MaaS (Mobility as a Service). In addition, as capital investment to upgrade systems continues to increase in line with the development of AI and IoT and towards diffusion of the next-generation mobile technology 5G, capital investment-related demand for high-precision machinery is likely to further rise.

While the economy is expected to recover from the latter half of the year owing to growing expectations that the impact of the spread of the COVID-19 will be brought to an end by the start of vaccination. We see, however, that the business outlook remains uncertain since there are risks, such as the further spread of the infection, delays in vaccine supply, and pressure on national finances around the world.

Under these circumstances, each segment is forecast to perform in the next fiscal year as follows:

Machine Tool	Net sales	¥41,200 million	Y/y change (rate)	Up 8.4%		
Segment	Operating income	¥4,800 million	Y/y change (amount)	Up ¥1,903 million		
We see demand for capital investment will be on a recovery trend since, in addition to continuing recovery of demand in the 5G-related and semiconductor-related fields centered on China, which is the Company's largest market, demand for high-precision machines is forecast to increase in line with highly-advanced manufacturing accompanied by the promotion of next-generation auto-related industries products such as CASE, and the global economy, which slowed down due to the spread of the COVID-19 infection and associated lockdown measures in major cities around the world, is expected to revive.						
Industrial Machinery	Net sales	¥10,300 million	Y/y change (rate)	Down 5.8%		
Segment	Operating income	¥500 million	Y/y change (amount)	Down ¥96 million		
generation auto-related	cted to remain strong for 50 I industries products such a rin more orders by meeting	s CASE, the competitive	environment seems to bec			
Food Processing	Net sales	¥6,500 million	Y/y change (rate)	Up 81.3%		
Machinery Segment	Operating income	¥300 million	Y/y change (amount)	Up ¥234 million		
In addition to the postponed capital investment projects from 2020 due to the spread of COVID-19, the food processing machinery segment is likely to see an increase demand both in Japan and abroad for high-quality noodle making equipment as well as sterile-packed cooked rice production systems and automated production facilities.						
Others	Net sales	¥7,400 million	Y/y change (rate)	Up 34.8%		
Omers	Operating income	¥700 million	Y/y change (amount)	Up ¥380 million		
and communications e	nics are expected to see corquipment, while demand in items in the automotive ind	the die and mold manufa				

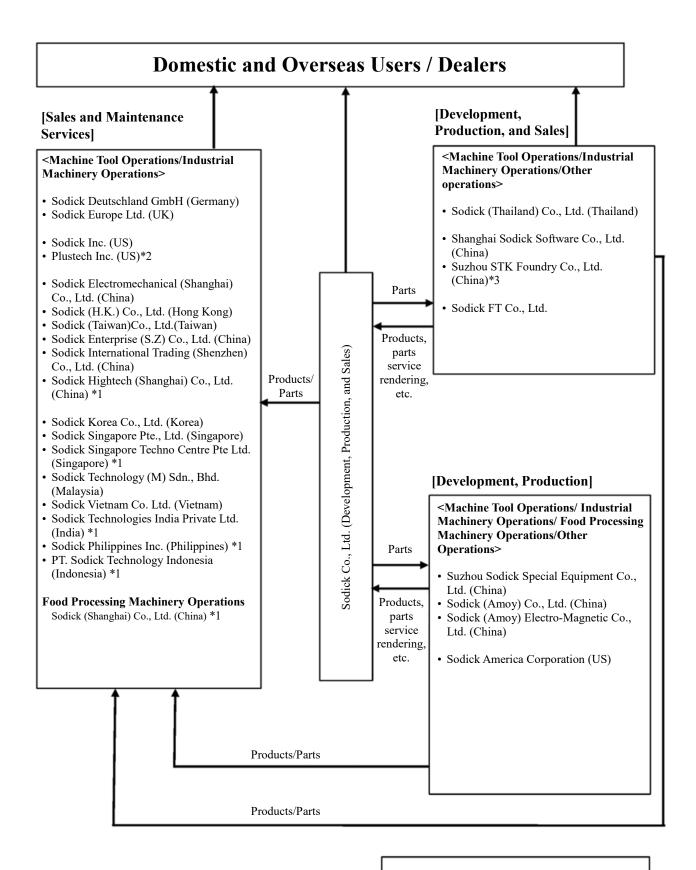

For the fiscal year ending December 31, 2021, Sodick Group aims to achieve net sales of \(\frac{\pmathbf{\text{4}}}{65,400}\) million (up 12.7% year on year), with operating income of \(\frac{\pmathbf{\text{4}}}{4,100}\) million (up 121.3%), ordinary income of \(\frac{\pmathbf{\text{4}}}{4,100}\) million (up 100.3%), and net profit attributable to owners of the parent of \(\frac{\pmathbf{\text{3}}}{3,000}\) million (up 122.7%). These forecasts are based on the fiscal year average exchange rate of 104 yen against the U.S. dollar and 122 yen against the euro.

	FY ending Dec. 31, 2021 Full-year forecasts (¥ Million)	Fiscal year ended December 31, 2020 Actual results (¥ Million)	Year-on-year change (%)	
Net sales	65,400	58,030	12.7	
Operating income	4,100	1,852	121.3	
Ordinary Income	4,100	2,046	100.3	
Profit attributable to owners of the parent	3,000	1,346	122.7	

Note: Please be reminded that these projections reflect judgments of the Company using currently available information. Depending on both known and unknown risks and uncertain factors, actual results may differ from these projections.

2. Corporate Group

The operations of Sodick Group consist of the following four divisions: (i) Machine Tool Operations engaged in the development, production, and marketing of electrical discharge machines (EDMs), machining centers, and metal 3D printers; (ii) Industrial Machinery Operations engaged in the development, production, and marketing of injection molding machines; (iii) Food Processing Machinery Operations engaged in the development, production, and marketing of mainly noodle production plants, noodle production equipment, and sterile-packed cooked rice production systems; and (iv) Other operations include precision mold and precision molding operations involving the made-to-order production of precision connectors and other products, and element technology operations involving the sale, etc. of linear motors and ceramic components. These operations work together in organic interconnections to contribute to the business of Sodick Group. The following diagram gives an overview of the main business relationships in the Group.

Unmarked = Consolidated subsidiaries

- *1 Non-consolidated subsidiaries
- *2 Affiliates included under the equity method
- *3 Affiliates not included under the equity method

3. Basic Approach to the Selection of Accounting Standards

As a matter of policy, Sodick Group has been preparing its consolidated financial statements in accordance with the Generally Accepted Accounting Principles of Japan, which has the advantage of facilitating comparisons with prior accounting periods and other companies. For the time being, this policy remains in force. A shift to the application of International Financial Reporting Standards (IFRS) would depend on future developments in Japan and overseas.

(Segment information, etc.)

1. Summary of reportable segments

Reportable segments are business units of Sodick for which stand-alone financial information is available and whose allocation of management resources and financial results are, at regular intervals, the subject of decisions and assessments of the board of directors.

Sodick runs its business operations using comprehensive strategic planning that distinguishes between products and services. The Group's three reportable segments comprise the Machine Tool Segment, the Industrial Machinery Segment and the Food Processing Machinery Segment.

Main products by segment comprise electrical discharge machines and machining centers in the Machine Tool Segment, plastic injection molding machines in the Industrial Machinery Segment, and noodle production plant and equipment in the Food Processing Machinery Segment. In each segment the scope of operations includes product development, manufacture, and sales.

- 2. Method of computation of net sales, income or loss, assets, liabilities, and other items by reportable segments The accounting methods used in each reportable segment are the same as described in the "Important Matters Concerning the Basis of Preparation of Consolidated Financial Statements."
 - Income information of reportable segments reflects operating income.
 - Intersegment sales data are based on arm's length transaction prices.
- 3. Information on sales, operating income (loss), assets, and other items by reportable segment Fiscal year ended December 31, 2019 (from January 1, 2019 to December 31, 2019)

	Reportable Segment						(-	Amount
