Notice Concerning Revisions to Full-Year Financial Results Forecasts

Sodick Co., Ltd. (the "Company") hereby announces that in light of the most recent operating trends, a decision was passed at the meeting of the Board of Directors held on August 7, 2026, to revise the financial results forecasts for the fiscal year ending December 31, 2026, disclosed on February 13, 2026, as described below.

1. Revisions to full year consolidated financial forecasts for the current fiscal year (January 1, 2026 through December 31, 2026)

	Net sales	Operating profit	Ordinary profit	Profit attributable to owners of parent	Earnings per share
	Million Yen	Million Yen	Million Yen	Million Yen	Yen
Previously announced forecasts (A)	88,500	5,500	6,000	5,100	100.70
Revised forecasts (B)	97,000	9,200	9,900	7,400	148.07
Change (B-A)	8,500	3,700	3,900	2,300	
Change (%)	9.6	67.3	65.0	45.1	
(Reference) Consolidated results for the previous fiscal year (FY ended December 31,2025)	80,572	4,224	5,231	4,514	89.19

2. Reason for revision

With respect to the consolidated financial results forecast for the fiscal year ending December 31, 2026, although global procurement risks for parts and materials have increased due to the prolonged situation in the Middle East and the impact of recent earthquakes, sales of EDMs in the Machine Tool Segment have remained strong, supported by robust demand in Greater China. In addition, the depreciation of the yen relative to the exchange rates assumed at the beginning of the fiscal year has had a positive impact on results. As a result, net sales are expected to exceed the previously announced forecast. On the profit side, operating profit is expected to significantly exceed the previous forecast, primarily due to higher factory utilization rates resulting from increased production volume in the Machine Tool Segment. In addition, ordinary profit and profit attributable to owners of parent are expected to substantially exceed the previous forecast, mainly due to the recording of foreign exchange gains resulting from the depreciation of the yen, as well as customs duty refunds recognized during the first half of the fiscal year.

The principal exchange rate assumptions underlying the revised forecast for the second half of the fiscal year are JPY 155 per U.S. dollar and JPY 180 per euro.

Note: The forecast figures contained in this document are based on information currently available to the Company and certain assumptions deemed reasonable as of the date of this announcement. Actual results may differ materially from these forecasts due to various factors.
