Financial Results by Segment

Machine Tool Segment

Net sales

Japan: Although the automotive business remained sluggish, electronic components, the aerospace, and energy-related business performed steadily.

Greater China: Overall market conditions remain strong, with steady demand particularly for electronic components, mobile-related products, and NEVs (New Energy Vehicles).

Asia: While there are differences by country and region, demand remains steady for electronic components and semiconductor-related products, mainly connectors and HDD-related products.

Americas: While the automotive business remained sluggish, energy-related demand, including power systems for data centers, as well as demand in the aerospace and medical sectors, remained solid.

Europe: Despite weakness in the automotive business, the aerospace, medical sectors remained solid.

Profit

Profitability improved due to an improved factory operation rate, resulting in higher profits.

■ Food Machinery Segment

Net sales

Demand for noodle making machine and prepared food equipment remained steady both in Japan and overseas, sales were negatively impacted by a decline in sales of aseptically-packaged cooked rice production systems due to changes in the competitive environment.

Japan:

Stable demand for noodle making machine, mainly from the foodservice industry and national brands (NB).

Overseas:

Demand for noodle making machine in Greater China and South Korea remained solid.

Profit

Segment profit declined due to the impact of high-margin projects in the previous period, but profitability remained solid.

FY2026 Full-year Financial Results Forecast

- ✓ Net sales remained steady, driven by the machine tool business.
- ✓ On the earnings side, progress exceeded the plan, supported by higher sales, an improved factory operation rate, and favorable foreign exchange effect.
- ✓ However, due to increasing geopolitical risks such as the escalating situation in the Middle East, the outlook remains uncertain; therefore, the full-year plan announced at the beginning of the fiscal year has been left unchanged at this time.

7. Composition of Segments and Key Products

Segment	Machine tools		Industrial machinery	Food machinery	
Major products	Die-sinker EDM 	Wire-cut EDM 	Horizontal injection molding machine 	Noodle making machines (noodle production line)  	
	Small-hole drilling EDM 	Metal 3D printer 	Vertical injection molding machine 	Aseptically-packaged cooked rice production system *Part of the production line 	
	Machining center 	Laser processing machine 	Light metal injection molding machine 	Other food processing machines  	
Sales market	Automotive, home appliances, electrical and electronic devices, aerospace, medical devices, energy, etc.		Automotive, electrical and electronic devices, medical devices, etc.		
Production sites	 Kaga		 Kaga	 Kaga	
	 Thailand  Suzhou			 Thailand  Amoy

8. Topics for Q1 FY2026

Held a Private Show, “V-LINE Circular Eco Tour”

- The event was held in response to growing interest in SDGs and carbon neutrality, amid increasing expectations for corporate initiatives in waste plastic recycling.
- In addition to our conventional efforts in “direct horizontal recycling,” we have developed a complete machine designed to pursue a circular economy.
- The tour featured live molding demonstrations using the latest models and was held at five locations across Japan: Yokohama, Osaka, Saitama, Sendai, and Matsumoto.

What is a “Circular Economy”?

It aims to keep resources in use for as long as possible while minimizing waste.

“Direct Horizontal Recycling Molding” Enabling a Circular Economy

The molding system enables the production of the same products using materials derived from end-of-life products.
